Skills and Certification

Fullstack Developer (Web and Mobile Apps Developer) **Oct 2025 - Now**

PT Norxel Teknologi Indonesia

Developing internal systems used by technicians and operational teams to maintain cash and non cash machines across Indonesia. Contributed to both mobile and web platforms, covering route cause analysis, solution, system design, and implementation.

- Streamlined technician workflows through system analysis and process digitalization

- Designed and optimized database architecture for consistent and reliable reporting.
- Customer and machine database fixing with python
- Analysis and making of system for technician, monitoring and product specialist staff :
  1. Web Dashboard (Next.js & Laravel) for monitoring, reporting, and internal coordination for monitoring and product specialist roles. Product specialist give root cause analysis and solution to technician and Monitoring make a schedule of technician route in a day.
  2. Mobile Application (Flutter) with routing and location for technician based task assignments using OpenStreetMap.
  3. Integrated modules with finance control system, monitoring, general affair and HR system

Magenta BUMN Internship (Sinergi Gula Nusantara) **Oct 2023 - Mar 2024**

Magenta Attendance Mobile Apps (Flutter)

Develop an attendance mobile apps application for magenta internship participant using flutter with maps integration check-in and out

- UI/UX design, layouting coding in flutter, realtime maps integration and push notification to firebase, send absence information to API

Greens - Sugar Cane Monitoring Input Application (Flutter)

Develop a mobile apps for inputting data into a database via API, monitoring sugar cane status and ticket printing on POS machines.

- UI/UX design, layouting coding in flutter, API data input to database, get info location and POS machine ticket printing integration

Mobile Apps Developer (Supranusa Sindata) **Jun 2024 - Aug 2024**

VHP Dashboard Mobile (Java)

Develop a Visual hotel program application for hotel management using Java.

- Converted UI design into pages within the android application and resolved bugs in the VHP Dashboard android version.

Bootcamp Fullstack Web Developer (Dumbways.id) **Jan 2025 - Now**

Learn and Create Website (React JS &Vite, Next.JS, Express, Tailwind and many more)

Join online and offline bootcamp, making project for learning and upscale my skill

- Making of many web project, with version control on github and deployed on vercel.
- Make automation with n8n, automatic telegram bot for making content from gemini API, save data in supabase, auto update to notion and sent notification automatically to telegram bot.

Community Advocate **June 2025 - Now**

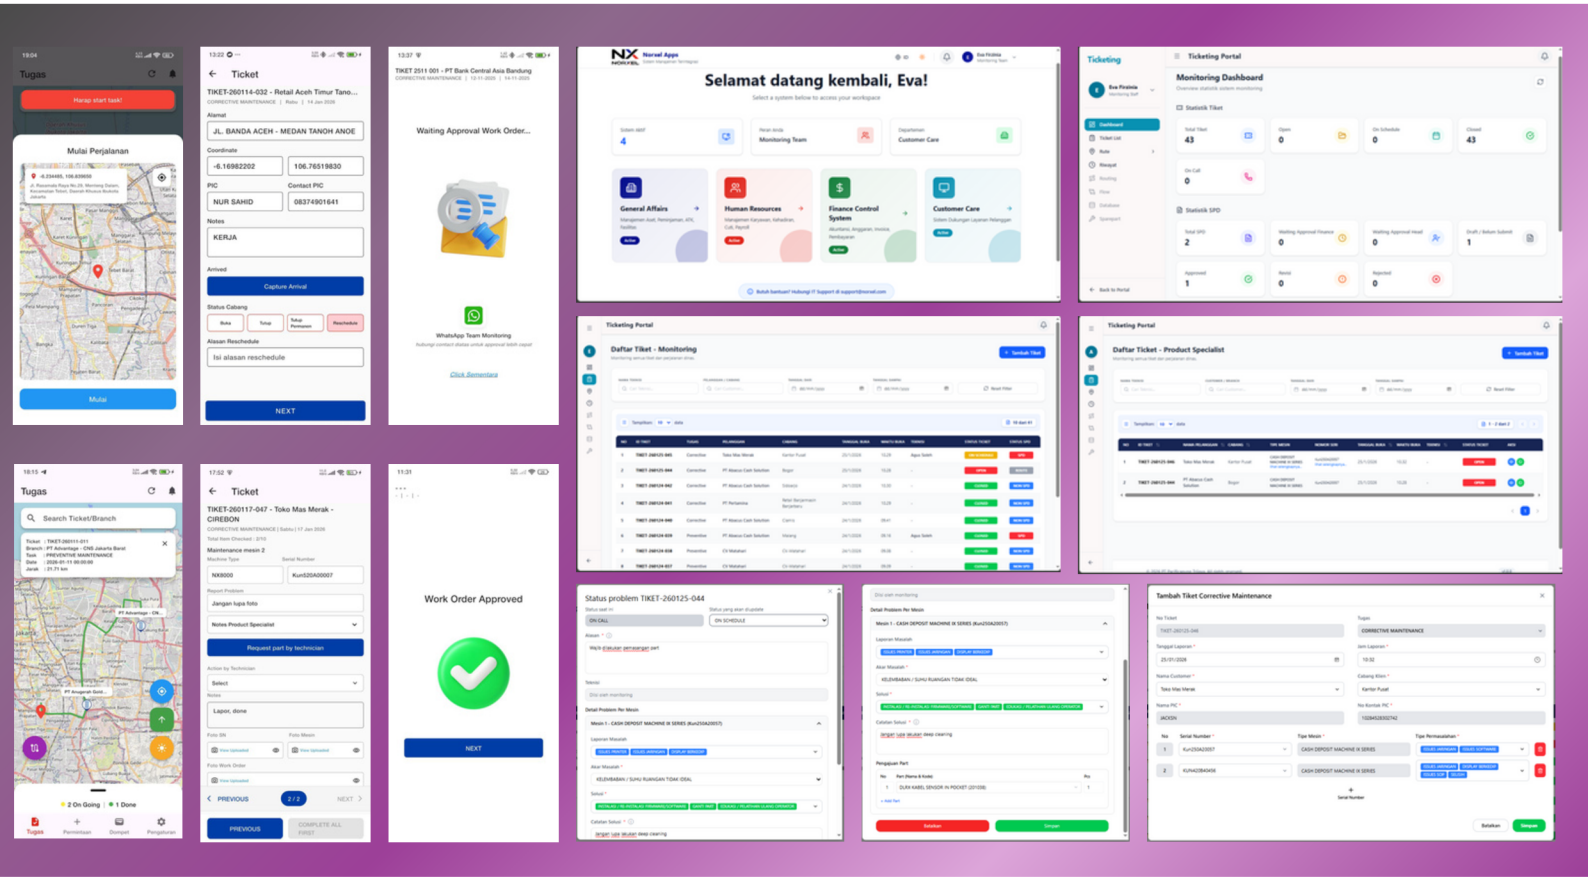

Online platform for learning web3 called Hackquest.io

Promote and grow the HackQuest Web3 learning community by introducing the platform to the public and inviting new learners to explore Web3 from zero.

- Promote and invite people to learn on Eclipse, 0G, Arbitrum, Mantle, Ethereum blockchain free co-learning camp for 2 weeks
- Create technical blogs post, informative video, help community manager and many more

Invocanteen

Field Operations & Task Management Web and Mobile App (Norxel Apps)

Tech Stack :

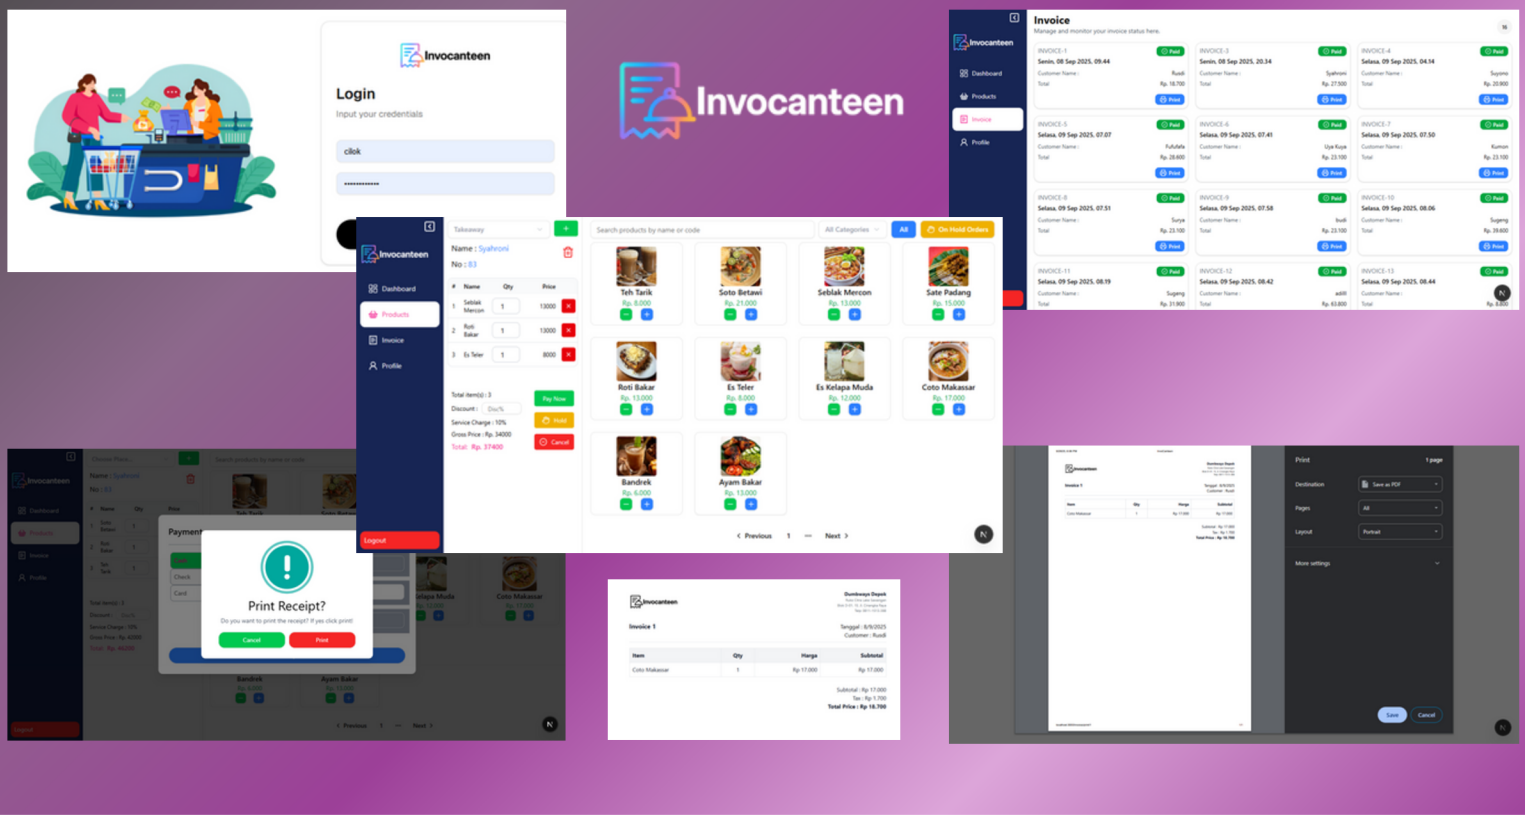

Norxel Apps is an internal field maintenance and monitoring platform designed to support operational teams and technicians in maintaining cash and non cash machines all across Indonesia. The system enables mapping, routing and realtime features.

Repository :

Private repository – access restricted

Invocanteen

Website management for food selling integrate to print invoice
